Connection Methods

Connection Method 1: P90R / PH-L

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.

Connection Method 2: Counter Legs with thumb screw

First, choose an orientation for the counter leg to be positioned on the under side of the counter top. With the counter leg in place, use the thumb screws to fasten the top plate of the leg onto the underside of the counter top. Do not over tighten.

Connection Method 3: SS1-1

First, take the shelf support and loosen the set screw to about a 1/4 inch gap. Do not remove it. Second, slide the shelf support into the 3mm center channel. Turn the shelf support clock wise to lock it in place. Third, rest the shelf onto the shelf support. Loosen the shelf support to adjust and level.
Kit Assembly
Step by Step

Step 1.
Locate your V-CAB-01-DR and V-CAB-01-FR assemblies. Both frames should have preinstalled graphics. V-CAB-01-DR should also have a locking door, test to ensure it is properly functioning.

Reference Connection Method 1 for more details.

Step 2.
Locate (2) PH-280-S-S extrusions. Lock into place so that the hex bolt heads face inward to the cabinet and the extrusion is flush with the V-CAB-01-DR and V-CAB-01-FR.

Reference Connection Method 1 for more details.

Step 3.
Locate (2) PH-280-S-S extrusions and cabinet side graphic panels. Slide your graphic into the channels of V-CAB-01-FR and V-CAB-01-DR. Next, lock your PH-280-S-S extrusions above the graphics.

Reference Connection Method 1 for more details.

Step 4.
Locate your V-LG-02 and V-CU-CT-01 counter top. Note the imprinted placement templates on the underside of your counter top. Match the V-LG-02 with the counter top in the desired orientation. Lock your V-LG-02 to the counter top with the provided fastening hardware.
