Formulate Counter - Pillar

W-01-C
Formulate® counters couple lightweight hardware with printed stretch silicone edge fabric graphics (SEG) to create funky and functional reception stands. Tables and bases are available in four colored finishes – silver, black, mahogany and natural. Custom sizes also available.

features and benefits:
- Printed stretch silicone edge fabric graphics (SEG) for a custom look
- Counter supports 25 lbs. of weight on center
- Choice of four finishes for table and base
- Kit includes: frame, dye-sublimated fabric graphic, top and base, and wheeled molded OCH2 storage case
- Lifetime hardware warranty against manufacturer defects

COUNTER
Connection Methods

Formulate® structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

**Connection Method 1:**
**ES30 / ES50 / ES75**

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 2:**
**Snap Buttons & Swage**

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

**Connection Method 3:**
**ES30-90B / ES30-I / ES30-C**

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 4:**
**Tube Clamps**

TCP  
TC  
TCH  

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame’s tubes in the clamp, be sure to lock securely, but do not overtighten.
**Begin by threading your 2” studs through the holes of the base.** Attach your TRI30-COUNTER support beam and secure using (3) wingnuts.

**Thread the 1.25” studs into the countertop.** Align the countertop so that the studs fall through the holes of the TRI30-COUNTER beam. Secure the countertop using the remaining (3) wingnuts.

**Pull your graphic over TRI30-COUNTER beam and push the edges into the seems of the base.**

Push the top edges of the graphic into the seems of the counter top to complete your assembly.

**Setup Complete.**
