

Immerse Acoustic Dividers

IMS-ACOU-TRI-SM
IMS-ACOU-TRI-MD
IMS-ACOU-TRI-LG

Immerse™ is a sound-absorbing, 9mm thick rigid felt material designed to absorb sound. The Immerse line of acoustical partitions places emphasis on softening sound to enhance the acoustics within a space, whether it be for the home or corporate office. Through noise absorbing material and specific design features, excess sound is captured by Immerse, creating an acoustically comfortable environment that provides stillness and promotes peace of mind and well-being.

We are continually improving and modifying our product range and reserve the right to vary the specifications without prior notice. All dimensions and weights quoted are approximate and we accept no responsibility for variance. E&OE. See Graphic Templates for graphic bleed specifications.

x6

**BLACK & WHITE
HOOK & LOOP**

STEP 1: Changing Hook & Loop

Feed white or black hook & loop in to one of the slots on the center panel then feed it through the corresponding slot on the side panel. Close the hook and loop strip on to itself to secure the panel. Repeat on all connection points.

STEP 1

STEP 2

STEP 3

STEP 2: Setup

Next, stand unit upright. Place in desired location.

STEP 3: Additional features

Thumb tacks and push pins can be used on this material to hold notes and messages etc. The bottom slot is great for wire management for laptops, office phone or cell phone chargers.
