Kit Assembly

Step by Step

Step 5.
Gather the components to assemble top truss. Use the Exploded View Diagram for part labels.

Reference Connection Method(s) 1 for more details.

Step 6.
Gather the components to attach top truss. Use the Exploded View Diagram for part labels.

Step 7.
Gather the components to attach counter tops. Use the Exploded View tops. Use the Exploded View Diagram for part labels.

Reference Connection Method(s) 3 for more details.

Step 8.
Attach graphic with velcro, along top and sides of truss and towers. Use the Exploded View Diagram for part labels.
Kit Assembly

Step by Step

Step 9.
Gather the components to assemble bungee cord 3 section pole. Once assembled, place in pole pocket. Use the Exploded View Diagram for part labels.

Step 10.
Attach portable case counter.
Setup complete.
Connection Methods

Connection Method 1: CONNECTING FRAMES

First, insert the threaded screw into the opening of the lower frame. Once in place, hold the lower section pole with your hand. This makes it easy to tighten. If you don't hold the lower pole, both will spin. Then, tighten the top pole with the other hand. Be sure not to over tighten, as this could strip or damage the parts.

Connection Method 2: ASSEMBLE MONITOR MOUNT

First, untighten the screw at the top. Once the screw is loose, pull the lever up until you can slide the mount into the groove. Once in place, pull the lever down until it stops. Lightly tighten the screw to ensure it does not strip or damage parts.

Connection Method 3: COUNTER TOP ASSEMBLY

First, screw the CONSTRUO-CNTR-SHFT into the top of the CONSTRUO-BTM-TRUSS LEFT & RIGHT. Second, only half tighten the CONSTRUO-CNTR-SHFT into place. If you tighten all the way, you will not be able to attach the counter. Third, a line both connect points, once a line attaches. Once the counter is attached, tighten the CONSTRUO-CNTR-SHFT, but be sure not to over tighten.
