## Connection Methods

<table>
<thead>
<tr>
<th>Connection Method 1: ES30 / ES50 / SNAP BUTTONS</th>
<th>Connection Method 2: SILICONE EDGE FABRIC GRAPHIC</th>
</tr>
</thead>
</table>

For spigot connections, compress the unlocked connector and slide into the tube lock access hole. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten. For snap button connections, locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

<table>
<thead>
<tr>
<th>Connection Method 3: ES30 / ES50 / SNAP BUTTONS</th>
<th>Connection Method 4: Shelf / Thumb screw</th>
</tr>
</thead>
</table>

First, make sure you have the stabilizing base plate with the large counter sink hole facing down for a flush finish when inserting the screw from the under side. Second, fasten the plate onto the tube with the installed threaded insert. Use the provided allen key tool to make a tight fit. Do not over tighten. Loosen the screw to rotate the plate.

First, rest and align the under side of the shelf onto tube #3 mounting plates. Second, use the thumb screws provided to fasten the shelf onto tube 5 mounting plates.
Connection Method 5: TC-30

First, loosen the channel bar with the two set screws on the inside of the tube clamp. Do not disassemble it. Slide the clamp channel bar into the desired extrusion channel. Once it is in the desired location, tighten the channel bar screws. Second, loosen the clamp with the side set screw. Do not disassemble it.
Kit Assembly

Step by Step

Step 1.
Gather the components to build the frame. Use the Exploded View and the Labeling Diagram for part labels.
Reference Connection Method(s) 1 and 2 for more details.

Step 2.
Pull the pillowcase graphic over the frame and zipper it closed. Make sure to have the tubes protruding through the holes of the fabric.

Step 3.
Gather the components to build the shelf and the stabilizing bases. Use the Exploded View for part labels.
Reference Connection Method(s) 3 and 4 for more details.

Step 4.
Attach the canopy to your backwall. Use the Exploded View for part labels.
Reference Connection Method(s) 5 for more details.
