Formulate® Designer Series 30ft displays have unique stylistic features and shapes, are portable and easy to assemble. The aluminum tube frame features snap-buttons and/or spigot connections and zipper pillowcase fabric graphics. All displays come in portable, wheeled transit cases. Simply pull the pillowcase fabric graphic(s) over the frame and zip.

**features and benefits:**

- Premium aluminum tube frames with snap button assembly
- Straight shaped frames
- Easy to store and ship
- Quick to set up
- Weighted feet for added stability
- Three zipper pillowcase fabric graphics
- Lifetime limited hardware warranty against manufacturer defects

OVERVIEW
Formulate™ structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

**Connection Method 1:**
**ES30 / ES50 / ES75**

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your hex key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 2:**
**ES30-90B / ES30-I / ES30-C**

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

**Connection Method 3:**
**Tube Clamps**

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your hex key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 4:**
**Snaps Buttons & Swage**

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame’s tubes in the clamp, be sure to lock securely, but do not overtighten.
Kit Assembly
Step by Step

Step 1.
Gather the components necessary for assembling Frame A and lay them flat on the floor. Assemble in the order the Labeling Diagram instructs.

Please reference Connection Method 2 for more details.

Step 2.
With Frame A laying flat on the floor, locate your pillowcase A graphic. With the pillowcase unzipped, encase Frame A by covering the frame from top to bottom.

Step 3.
Gather the components necessary for assembling Frame B and lay them flat on the floor. Assemble in the order the Labeling Diagram instructs.

Please reference Connection Method 2 for more details.

Step 4.
With Frame B laying flat on the floor, locate your pillowcase B graphic. With the pillowcase unzipped, encase Frame B by covering the frame from top to bottom.
Kit Assembly
Step by Step

Step 5.
Gather the components necessary for assembling Frame C and lay them flat on the floor. Assemble in the order the Labeling Diagram instructs.

Please reference Connection Method 2 for more details.

Step 6.
With Frame C laying flat on the floor, locate your pillowcase C graphic. With the pillowcase unzipped, encase Frame C by covering the frame from top to bottom.

Step 7.
Locate the LN114-S2-450 stabilizing foot. Attach the foot to the left side of Frame A. Use the hex key tool provided to lock the foot to the TC-30-90B on the frame.

Step 8.
Locate the LN114-S3 stabilizing foot. Attach the foot to the right side of Frame A and the left side of Frame B. Use the hex key tool provided to lock the foot to the TC-30-90B on the frame.
Kit Assembly

Step by Step

Step 9.
Locate the PLT-BP-LN114-S3-450 stabilizing foot. Attach the foot to the right side of Frame B and the left side of Frame C. Use the hex key tool provided to lock the foot to the TC-30-90B on the frame.

Step 10.
Locate the PLT-BP-LN114-S2-450 stabilizing foot. Attach the foot to the right side of Frame C. Use the hex key tool provided to lock the foot to the TC-30-90B on the frame.

Step 11.
Use the two TCH-30-B2B tube clamp connector to brace the frames together.

Please reference Connection Methods 4 for more details

Step 12.
Setup is complete.
