Formulate Master 3D Hanging Structures: Capsule

**CAPSULE-10**
Formulate® tension fabric hanging structures are made in the USA and are of the utmost quality and durability. Formulate combines state-of-the-art zipper pillowcase dye-sublimated stretch fabric coverings with advanced, lightweight aluminum structures to provide unique design, functionality, and style.

**features and benefits:**
- 10’ shapes are constructed with 30mm (1.25”) tubes and push button connectors for simple assembly.
- 14’ shapes and over are constructed with 50mm (2”) tubes and internal expanding spigot connectors for unmatched structural integrity
- Easy to store and ship
- Quick to set up
- One zipper pillowcase fabric graphic
- Lifetime limited hardware warranty against manufacturer defects

Connection Methods

Formulate® structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

Connection Method 1: ES30 / ES50 / ES75
Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten.

Connection Method 2: Snap Buttons & Swage
Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Connection Method 3: PE to Custom Aluminum Threaded Plate
Hand fasten screws with washers carefully using your allen key tool. Be sure to fasten securely, but do not over tighten.

Connection Method 4: Internal Lighting Setup
Be sure to fully assemble all frames before using the internal lighting components. With the thumbscrews loosened, place the light strips on the frame, then hand tighten them in series, male to female connections with extension cords. Do not over tighten the thumbscrews. Snap on the wire management clamps and extrusions with the power cord extensions in place. Reference the Internal Lighting Diagram for more details.
Gather the tube and spigot components to build Frame A. Using the provided ALLEN KEY SET, hand tighten the spigots. Assemble in the order as the Exploded View FRAME A and Labeling Diagram FRAME A pages instructs.

Refer to Connection Methods 1 and 2 for additional information.

Step 1.

Step 2.
Locate the two part graphic pillowcase. With the pillowcase unzipped, encase the frame from the bottom to the top. Zip the pillowcase fabric closed at the top.

Setup is complete and ready to hang.
