Connection Methods

Formulate® structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

**Connection Method 1:**
ES30 / ES50 / ES75

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 2:**
Snap Buttons & Swage

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

**Connection Method 3:**
ES30-90B / ES30-I / ES30-C

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 4:**
Tube Clamps

TCP
TC
TCH

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame’s tubes in the clamp, be sure to lock securely, but do not overtighten.
Kit Assembly

Step by Step:

Step 1.
Locate the components necessary for assembling Frame A referenced on the exploded view page. Assemble your frame in order according to the Labeling Diagram.

Please reference Connection Methods 1 and 2 for more details.

Step 2.
Apply the TIER-RNG-12-TOP-G graphic pillowcase around the frame from the bottom and then zipper around the top edge.

Step 3.
Locate the components necessary for assembling Frame B referenced on the exploded view page. Assemble your frame in order according to the Labeling Diagram.

Please reference Connection Methods 1 and 2 for more details.
