Formulate Master 3D Hanging Structures: Tiered Ring Flat

TIER-RNG-FLT-10, TIER-RNG-FLT-12, TIER-RNG-FLT-14, TIER-RNG-FLT-16
Formulate® tension fabric hanging structures are made in the USA and are of the utmost quality and durability. Formulate combines state-of-the-art zipper pillowcase dye-sublimated stretch fabric coverings with advanced, lightweight aluminum structures to provide unique design, functionality, and style.

**features and benefits:**
- Premium aluminum frames constructed with 30mm (1.18”) and 50mm (2”) tubes
- Internal expanding spigot and snap button connectors for unmatched structural integrity
- Easy to assemble, store and ship
- Quick to set up
- Three zipper double sided printed pillowcase fabric graphics
- Lifetime limited hardware warranty against manufacturer defects

**Connection Methods**

Formulate® structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

**Connection Method 1:**
*ES30 / ES50 / ES75*

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 2:**
*Snap Buttons & Swage*

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

**Connection Method 3:**
*ES30-90B / ES30-I / ES30-C*

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

**Connection Method 4:**
*Tube Clamps*

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame’s tubes in the clamp, be sure to lock securely, but do not overtighten.
Gather the components necessary for assembling Frame A. Assemble in order according to the Labeling Diagram.

Please reference Connection Method 1 and 2 for more details.

Step 1.

Step 2.
Apply the pillowcase graphic onto the frame. The eyebolts should protrude from above and below at six points. Zipper the pillowcase closed from the inside perimeter.

Gather the components necessary for assembling Frame B. Assemble in order according to the Labeling Diagram.

Please reference Connection Method 1 and 2 for more details.

Step 3.

Step 4.
Apply the pillowcase graphic onto the frame. The eyebolts should protrude from above and below at six points. Zipper the pillowcase closed from the inside perimeter.
