Hybrid Pro Modular Backwall Kit 28

HP-K-28

Hybrid Pro™ Modular Kit 28 is a dynamic modular exhibit that features an 8’ tall backwall, six shelves for small product display and a Push-fit SEG fabric graphics are easy to apply to the backwall and the interior and exterior facing side walls.

features and benefits:

- Silver aluminum extrusion frame
- SEG push-fit fabric graphics
- six shelves for small product display; each shelf holds max 15 lbs
- Shelf color options: Silver, Black, Mahogany, Natural

- Ships freight in a protective plastic freight case
- Foreground counter not included
- Lifetime hardware warranty against manufacturer defects

Kit Assembly

Step by Step

Step 1.
Gather the components to build the 2 vector frame back walls. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 1, 2, 9, and 10 for more details.

Step 2.
Gather the components to build the side supports for both frames. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 3 and 8 for more details.

Step 3.
Attach front & rear graphics. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 6 for more details.

Step 4.
Assemble PM4S3-MK-SHELF-UNIT.

Reference Connection Method(s) Attach detail PDF follows this page on assemble instructions.
Kit Assembly

Step by Step

Step 5.
Arrange PM4S3 UNIT in desired position. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) Placement see PDF attached for instruction.

Step 6.
Re-attach Shelves to unit once in position for both PM4S3 shelf units. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) Placement see PDF attached for instruction.

-Gather the components to build HP-FS-7. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 7 for more details.

Step 7.

Step 8.

-Gather the components to build HP-FS-8. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 7 for more details.
Kit Assembly

Step by Step

Step 9.
Gather the components to build HP-FS-9. Use the Exploded View and the Labeling Diagram for part labels.
Reference Connection Method(s) 7 for more details.

Step 10.
Attach graphic to HP-FS-7. Use the Exploded View and the Labeling Diagram for part labels.
Reference Connection Method(s)

Step 11.
Attach graphic to HP-FS-8. Use the Exploded View and the Labeling Diagram for part labels.
Reference Connection Method(s)

Step 12.
Reference Connection Method(s)
Kit Assembly

Step by Step

Step 13.
Attach HP-FS-8 & HP-FS-7 to frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 11 for more details.

SETUP COMPLETE
Connection Methods

**Connection Method 1: CB9**

First, insert the corner connector into the extrusion while holding in the lock button with the allen key tool. Second, slide the next extrusion onto the same corner connector while holding in the lock button using the allen key tool. Third, use the allen key tool for locking the corner connector buttons in place. Use the allen key tool to make half turns clock-wise. Do not over tighten the lock buttons.

**Connection Method 2: IB2**

First, insert the in-line connector into the extrusion while holding in the lock button with the allen key tool. Second, slide the next extrusion onto the same in-line connector while holding in the lock button using the allen key tool. Third, use the allen key tool for locking the in-line connector buttons in place. Use the allen key tool to make half turns clock-wise. Do not over tighten the lock buttons.

**Connection Method 3: PH2**

First, slide the PH2 connector into post until rest on the PH2 stop. Second, then slide the top post onto the PH2 connector.

**Connection Method 4: CAM LOCK**

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.
Connection Methods

Connection Method 5: LN114-S2-650
First, line up base plate screw hole with PM4S3 inside nut. Second, insert screw tighten til plate is snug or no movement. Do not over tight this can damage the extrusion or inside nut.

Connection Method 6: Graphic Application
First, insert the silicone edge frame corners into the frame graphic channel (points 1 through 4). Second, insert the silicone edge frame sides into the frame graphic channel (points 5 through 8). Third, push the remaining silicone edge fabric into the frame graphic channel. Similar setup is recommended for the opaque liner. To remove these panels, simply pull the loop tag sewn near a corner.

Connection Method 7: ES30
First, compress the unlocked connector and slide into the tube lock access hole. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten. For snap button connections.

Connection Method 8: CAM LOCK
First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.
Connection Methods

Connection Method 9: PH1

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.

Connection Method 10: IB2/PH1 Application

First, insert the silicone edge frame corners into the frame graphic channel (points 1 through 4). Second, insert the silicone edge frame sides into the frame graphic channel (points 5 through 8). Third, push the remaining silicone edge fabric into the frame graphic channel. Similar setup is recommended for the opaque liner. To remove these panels, simply pull the loop tag sewn near a corner.

Connection Method 11: ADT-CAM-SM

ADT-CAM-SM is already embedded inside tube. First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.
Freestanding Monitor Kiosk

The Freestanding Monitor Kiosk is a superior multimedia display that can be used for multiple applications, as well as in trade show exhibits and for events. Kiosks include monitor mounts to support a medium or large size TV, and a corresponding medium or large shelf may be added. Monitor mounts support TV's up to 40 lbs and 32” - 70” in size, and can be adjusted to the perfect height; an included shelf can hold up to 15 lbs. The Shelf Unit is a great addition that proudly displays small products. Install the Freestanding line behind a fabric backwall for a truly impressive display.

features and benefits:
- Premium aluminum extrusion frames with cam lock and tension glide assembly
- Easy to store and ship
- Quick to set up
- Weighted feet for added stability
- Kits may include: a medium or large monitor mount, shelf, or combination
- Choice of medium or large monitor mount options. (Freestanding Monitor Kiosk with Shelf or Freestanding Shelf)
- Lifetime limited hardware warranty against manufacturer defects

additional information:
- Medium monitor mount can hold 37-70” monitor / max weight 40 lbs
- Large monitor mount can hold 40”-65” monitor / max weight 40 lbs
- Monitor not included
- Shelf can hold suggested max weight: 15 lbs
- If shipping with backwall kit cases may vary

We are continually improving and modifying our product range and reserve the right to vary the specifications without prior notice. All dimensions and weights quoted are approximate and we accept no responsibility for variance. E&OE. See Graphic Templates for graphic bleed specifications.

PM4S3-MK-L

Please note:
This is the kiosk frame build for either medium or large kit.
Exploded View

PM4S3-MK-SHELF-UNIT
Kit Assembly
Step by Step

Step 1.
Reference the image to the right. Locate the coded extrusions. Slide the PH2-300-TG connector into one end of the PM4S3-1200-A165-A165 so that it goes as deep as the internal pins. Connect the PM4S3-600-A165-A165 by sliding it over the PH2-300-TG. Repeat for this step for the second vertical.

Step 2.
Collect your extrusions and handtool. Using the provided handtool, lock the extrusions into the back channel of the three channel PM4S3 faces as shown in the image below. Be sure the locks face toward the back of the assembly and do not over tighten.

Step 3.
Locate the M5 thumbscrews, LN100s, and the PM4S3-MM stabilizing bases. Slide the LN100s into the middle channel of the PM4S3. Hand screw the M5 thumbscrews through the base holes and into the LN100 holes. Use the handtool to securely fasten the M5 Thumbscrews. Do not over tighten.

STOP
Orbus recommends that you move your kiosk(s) in place before continuing on with the rest of assembly.
Kit Assembly
Step by Step - Monitor Mount

Step 4.
This step is for kiosks with monitor mounts. Skip to step 7 for shelf kiosks.

Measure from the ground to the center of the hole in your main kit’s graphic. Lock the center of your PH5-100-L-L into the PM4S3 stacks at the dimension height of the graphic hole, ADD CBE-50 for support under PH5. Do not over tighten.

Step 5.
NOTE: Your main backwall assembly must be completed with graphics before completing this step of the monitor kit.

Lock your PM4S4-150 to the ends of the PH5-100-L-L. Do not over tighten.

Step 6.
Set your monitor stand so that the extrusion arms fit through the graphic hole. Use the provided fastening hardware to complete your monitor stand. Slide the LN100 into the bottom center channel of the PM4S4-150. Next, slide the Square Head Bolt into the top center channel of the PM4S4-150. Apply the monitor bracket and spacer washer before fastening with the wingnut. Monitor mount may vary depending on size. Monitor not included.

ATTACH CBE-50 UNDER PH5 FOR SUPPORT
Kit Assembly
Step by Step - Shelf

Step 7.
Insert the LN605-EN end caps. Lock the CT21-MK-SHELF to the PH-400-L-SIDE-MK. Do not over tighten.

Step 8.
Lock your PH-400-L-SIDE-MK into the PM4S3 stacks at the desired dimension height. Do not over tighten.

Refer to the attached supplemental sheet for details on shelf height(s).

Setup is complete.
Repeat steps 7 and 8 twice more for Shelf Unit.
Freestanding Display Shelf

PM4S3-MK-SHELF
Freestanding display shelves are easily attached to your assembled kiosk for displaying promotional materials. This shelf can be added to a Freestanding Monitor Kiosk order.

features and benefits:
- Premium aluminum extrusion frames with cam lock and tension glide assembly
- Easy to store and ship
- Quick to set up
- Lifetime limited hardware warranty against manufacturer defects
- Great for display opportunities
