# PRINT CAPABILITIES

# PRINT CAPABILITIES

With remarkable equipment, technology and a superior team, we can produce up to 38,000 sq. ft. of display graphics per hour. Our quality control and full service customer satisfaction team includes talented print production crews, sewing and finishing teams, pre-flight art staff and more, all dedicated to producing the best quality display graphics. We are proud to be able to provide consistent, high quality graphics with accurate color to the G7 specification.

## G7 certified

- The graphics we provide are G7 certified and printed on state-of-the-art equipment.
- G7 certification helps ensure the production of the highest quality, consistent and accurate color graphics.
- G7 specifies the components of an image that define a similar "visual appearance" to the human eye.

## dye-sublimation printing

Continuous evolution and investments in futuristic, remarkably fast, digital textile printers enable our production of display graphics in record time on a multitude of material types.

As a result, we have the ability to print a remarkable 23,000 sq. ft. per hour via 9 cutting-edge fabric printers. Our high-speed process produces vibrant six-color output up to 5 meters wide. Thanks to water-based inks and low consumption, the printing process is eco-friendly.

## latex/UV roll-to-roll & flatbed printing

With 6 state-of-the-art Latex/UV roll-to-roll and flatbed printers, we have the capacity to print over 15,000 sq. ft. per hour. Our UV printers provide vibrant graphics with excellent longevity on a variety of rigid and flexible substrates. We also have the capability to print white ink on a variety of materials such as plexiglass, colored sintra or other various custom applications. Once cured, the ink is bonded to the substrate and will not require lamination.

Our 3 high-speed UV roll-to-roll printers use vibrant, durable and flexible inks allowing us to print for a variety of indoor and outdoor applications. UV printing is one of our most popular and economical solutions for display graphics and outdoor tent graphic applications.

# FINISHING CAPABILITIES

We couple tenured expertise in staff with sophisticated, high-end graphic finishing and cutting equipment to ensure faster turnaround times and precise accuracy. Our print production, sewing, finishing and quality control teams are committed to producing superior, excellent quality display graphics.

## dye-sublimation finishing

Our highly-skilled sewing staff finishes each dye-sublimated fabric graphic by hand to ensure the perfect fit to the display frame. Fabrics are used for a number of products spanning our portable, custom modular and fabric architecture lines.

Our team custom tailors all types of graphics from hanging structures, pillowcase and SEG graphics to table throws, tents and outdoor flags. Custom graphic finishing such as zippers, silicone edge beading, hemmed edges and pole pockets are available upon request.

## digital cutting capabilities

Utilizing 3 state-of-the-art laser cutters, 4 routers and 2 banner trimmers, we create fast and efficient workflows for finishing graphics on fabrics, vinyl, PVC's and rigid graphics.

All UV printed vinyl banners are finished on a state-of-the-art automatic cutter, which trims graphics up to 50 ft. per minute. The combination of our high-speed UV printers with this cutting technology enables us to provide a remarkably fast turnaround time on all FLATMAXX vinyl banner graphics.

# PRINT MATERIALS

## dye-sublimation

### DISPLAY POLY

4oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Table throws &
runners

### POWER STRETCH

8oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Tension fabric systems, SEG
& pillowcase graphics

### AGILITY

5.5oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Xclaim displays &
custom graphic applications

### SUPER STRETCH

5.5oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Custom pillowcase structures
& complex shapes

### OXFORD

8oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Orbital Truss graphics &
custom banner applications

### RESILIENCE

8oz material
100% opaque fade-resistant
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Retractable banner stands

### ECLIPSE

6oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Non-illuminated custom
applications & SEG
graphics

### SOFT KNIT

5oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Tension fabric hanging
structures & custom
pillowcase graphics

### SHEER

2oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Custom graphic applications

### OUTDOOR FLAG

4oz material
Single sided
Available up to 120" wide
**Used for:**
Flags such as Zooms,
Wind Dancers, Stowaway
& custom outdoor flags

### BACKLIT TEXTILE

8oz material
Single sided
Available up to 120" wide
Indoor use only
**Used for:**
Custom backlit fabric
applications & backlit Hopups

## UV

### MELINEX

11mil thickness
Single sided
Available up to 50" wide
Indoor use only
**Used for:**
Retractable & Telescopic
banner graphics

### FLATMAXX VINYL

13oz curl-resistant vinyl
100% opaque
Single and double sided
Available up to 98" wide
Indoor use only
**Used for:**
Retractable, Telescopic &
free-hanging banner graphics

### OUTDOOR CANVAS

6.5oz material
Single sided
Available up to 120" wide
**Used for:**
Outdoor tents &
Water-resistant coating

### INTENSITY

6.5oz material
Single sided
Available up to 120" wide
**Used for:**
Intensity Backlit
SEG graphics

### OUTDOOR SCRIM

Single sided: 13oz outdoor
reinforced scrim
Double sided: 18oz outdoor
reinforced scrim
Available up to 120" wide
**Used for:**
Outdoor, free-hanging
banner graphics, Parkways
& Café Barriers

### STATIC CLING

7.5mil thickness
Available in opaque & clear
Available up to 63" wide
**Used for:**
Window applications
Adheres with static

### ADHESIVE BACKED VINYL

4oz material
Single sided
Available in opaque and clear
Available up to 54" wide
**Used for:**
Counters and rental panels

### TRANSLUCENT PVC

22mil thickness
Single sided
Available up to 48"w x 96"h
Indoor use only
**Used for:**
Popup bubble panels &
backlit detachables

### OPAQUE PVC

22mil thickness
Single sided
Available up to 60" wide
Indoor use only
**Used for:**
Pop-up panels, Orbital
Truss panels & detachables
